PROFESSIONAL SUMMARY

CS undergraduate who took a self-built product, MoodNest.in, from idea to a live platform onboarding 20+ organizers across 6+ Indian cities — deciding what to build, integrating third-party APIs (Cashfree, Google Places), and coordinating directly with organizers as stakeholders. Also built production APIs alongside a live engineering team at Webpoint Solutions, and coordinated with an external engineering team on system architecture for the Obsidian Intelligence System. Targeting a Product Management internship to bring this build-and-decide experience to product strategy and execution.

EDUCATION

Vellore Institute of Technology
Bachelor of Technology – Computer Science & Engineering

2023 – 2027
CGPA: 7.4/10

TECHNICAL SKILLS

Programming Languages: C++, Java, JavaScript, SQL
Backend & Databases: Node.js, Express.js, MongoDB, REST APIs, JWT Authentication
Frontend: React.js, HTML, CSS, Progressive Web Apps (PWA)
DevOps & Tools: Git, GitHub, Postman, Linux, Vercel, Render
Cloud & APIs: AWS, Google Cloud, Google Places API

WORK EXPERIENCE

Software Intern — Webpoint Solutions

Mar 2026 – Apr 2026

- Developed production REST APIs using **Node.js**, **Express.js**, and **MongoDB** powering core backend modules for enterprise ERP and LMS platforms.
- Implemented **JWT authentication** and **Role-Based Access Control (RBAC)** to strictly isolate access permissions across student, faculty, and administrator users.
- Collaborated with senior engineers to build and deliver production-ready backend features, optimize data models, and ensure clean API documentation.

PROJECTS

MoodNest.in — Live Event Ticketing Platform (MERN Stack)

Jan 2026 – Present

- Built and deployed an end-to-end event discovery and ticketing platform onboarding **20+ organizers** across **6+ Indian cities** (moodnest.in).
- Powered **30+ live events**, managing real-time ticket inventory and QR-based entry validation pipelines for over **1,000+ attendees**.
- Integrated **Cashfree Payments** for secure transactions and engineered an offline-capable **PWA** with **Google Places API** for venue search and duplicate booking prevention.

Obsidian Intelligence System — Client Automation Engine (Python)

Jul 2026

- Engineered a Python automation pipeline consolidating client data and meeting intelligence from **Fireflies.ai**, **HubSpot**, and **Outlook** into structured Obsidian knowledge vaults.
- Integrated **Fireflies.ai** and **HubSpot APIs** independently while collaborating with an external engineering team on system architecture.
- Documented **Azure AD tenant restrictions** that blocked Outlook API access, ensuring transparent project delivery and clear stakeholder reporting.

ACHIEVEMENTS & CERTIFICATIONS

- MSME Idea Hackathon 6.0:** Shortlisted for the Host Institute Screening Round at MANIT Bhopal (2026).
- NPTel Course Topper:** Top percentile in Marketing Analytics, IIT Kharagpur (2026).
- Adani Group Vande Bharatam:** Shortlisted for Round 1 of the nationwide entrepreneurship initiative (2026).
- Certifications:** Google IT Support Professional (2026), AWS Technical Essentials (2025), Google Bits & Bytes of Networking (2026), ISRO Geo-Data Processing (2024), Skill UP AI DevOps Analyst (2026).

EXTRACURRICULAR ACTIVITIES

- Core Team Member – AdvITYa 2025** (VIT Bhopal's annual techno-cultural fest): Contributed to event planning, technical logistics, and on-ground operational execution across the event.
